## **CBAM Declaration SIEKMANN ECONOSTO**

The European Union Regulation on the Carbon Border Adjustment Mechanism (CBAM) is part of the European climate protection strategy and aims to regulate CO<sub>2</sub> emissions associated with the import of certain goods from third countries and to align them with the European Emissions Trading System.

### **Assessment of Business Activities**

Siekmann Econosto GmbH operates as a supplier and distributor of industrial valves, components, and technical accessories.

The products we import are predominantly finished goods, which, under the current CBAM regulation, do not fall within the scope of application.

To a limited extent, CBAM-relevant raw materials are also imported. The total quantity of these materials is significantly below the statutory threshold of 50 tons per year.

### **Regulatory classification**

Based on the current legal requirements, the following assessment applies to Siekmann Econosto GmbH:

- There is no obligation to register in the CBAM system.
- There is no obligation to submit CBAM reports.
- There is no obligation to collect or transmit emissions data along the supply chain.
- There is no obligation to purchase or surrender CO<sub>2</sub> certificates.

### **Position in the Supply Chain**

Siekmann Econosto acts as a distributor and supplier of finished products and is neither a manufacturer nor a direct importer of CBAM-relevant raw materials in a volume that would trigger regulatory obligations.

Our supply chain is predominantly based on finished products that fall outside the current scope of CBAM.

### **Monitoring and Compliance**

Siekmann Econosto GmbH continuously monitors legal developments related to CBAM and regularly reviews its own level of impact.

For this purpose, an internal work instruction has been implemented to ensure annual assessment and continuous monitoring of regulatory requirements.

If you have any questions regarding the information provided, please do not hesitate to contact us.

Yours sincerely,

SIEKMANN ECONOSTO GMBH

  
Maximilian Tielking  
General Manager
